

SECOND ANNUAL JULIAN STEWARD AWARD

From the Anthropology & Environment Section of the American Anthropological Association

We are delighted to announce that Paul Nadasdy's *Hunters and Bureaucrats: Power, Knowledge, and Aboriginal-State Relations in the Southwest Yukon* (University of British Columbia Press, 2003) has been selected as the best book in ecological/environmental anthropology published in 2003 by the Anthropology & Environment Section of the American Anthropological Association. "*Hunters and Bureaucrats* is an extraordinary book in a number of ways," one of our judges, Dr. Roberto González of San José State University, observes. "Nadasdy is concerned with the relationship between the First Nations and the land, but he is also addressing questions of power between nation-states and indigenous peoples. He also examines the dilemmas of putting traditional ecological knowledge (TEK) into practice, including the fundamental problem of translating TEK." The award includes a \$500 cash prize.

Our panel of judges---Drs. William Durham of Stanford, Devon Peña of the University of Washington, and González---selected two other outstanding books as co-runners-up for the award: *Uneasy Alchemy: Citizens and Experts in Louisiana's Chemical Corridor Disputes* (MIT Press, 2003); and Christopher Coggins' *The Tiger and the Pangolin: Nature, Culture, and Conservation in China* (University of Hawaii Press, 2003).

Our congratulations to all three authors and their presses.

First Annual Julian Steward Award (1997-2002): *Zapotec Science: Farming and Food in the Northern Sierra of Oaxaca* (U of Texas Press, 2001)

Second Annual Julian Steward Award (2003): *Hunters and Bureaucrats: Power, Knowledge, and Aboriginal-State Relations in the Southwest Yukon* (U of British Columbia Press, 2003)
